

ColePago Wallet

ColePago Wallet - AI Features & Technology Stack

[Rocket] AI & Smart Features

- **Face Detection (Google ML Kit):**
 - Uses the selfie camera to detect faces.
 - Ensures only one face is present for secure transactions.
 - Obscures actions if multiple faces are detected.
- **Biometric Authentication:**
 - Supports fingerprint, face, and iris recognition.
 - PIN fallback if biometrics unavailable.
- **Notifications:**
 - Real-time transaction and activity alerts for parents and kids.

[Payment] Payment & Security

- **Stripe & Mercado Pago Integration:**
 - Secure, modern payment SDKs for wallet funding and transactions.
- **Parent/Child Authentication:**
 - Role-based access and secure login for both parents and children.

[Stack] Backend Stack

- **FastAPI:** High-performance Python backend for APIs.
- **PostgreSQL:** Reliable relational database for wallet and transaction data.
- **Docker:** Containerized deployment for easy scaling and portability.
- **Terraform:** Infrastructure as code for cloud provisioning and management.

[Mobile] Mobile App Stack

- **Flutter:** Cross-platform mobile app framework (Android/iOS).
- **Dart:** Modern language powering the Flutter app.

ColePago Wallet

- **Camera & ML Kit:** For face detection and camera-based features.
 - **Local Auth:** For biometric authentication.
 - **Shared Preferences:** For secure local storage.
 - **Dio & HTTP:** For robust API communication.
-

[Design] Visual Design & Promotion

- Colorful, kid-friendly branding with backpack logo
 - Modern UI/UX for both parents and kids
 - Secure, trustworthy, and easy to use
-
